		CESAR B PAULA Primary Examiner Art Unit: 2178			

Continuation of 11. does NOT place the application in condition for allowance because: The Applicants indicate that the specification provides support for claims 40, 47, and 52 (page7). The Examiner disagrees, because page 29, line 32-page 30, line 20 contains nothing related to the reception of data while, or after the application is being terminated. The specification on page. Page 32, lines 6-22 does not show the use of additional data to be operated upon by the application, before the application is run. It simply states that that data is stored from a server, before an operating unit is turned on. There is no description that the storage takes place in response to the turning on of the application as recited in claim 52. The additional data is operated on after the application is turned on not before as purported by the Applicants.

Regarding claim 40, the Applicants state that Shaw does not teach the receiving of data while the application is being terminated (page 8). The Examiner disagrees, because Shaw teaches the termination of the email application's connection to the server (col.4, lines 11-20). As far as the Examiner can understand the claim language in light of the 35 USC 112, 1st parag. rejection, Shaw is teaching the limitation in question.

Regarding claim 47, the Applicants indicate that Shaw does not disclose receiving additional data when the processor is not running an application (page 9, parag.5-page10, parag.1). The Examiner disagrees, because based upon the understanding of the claim in light of the 35 USC 112 rejection, Shaw teaches the display of advertisements, while the application is offline or the processor is not running to access data from the server (col.4, lines 41-46, col.14, lines 1-67).

Regarding claim 52, the Applicants indicate that Shaw does not disclose using additional data and displaying an advertisement based on the additional data, in response to a request to run the application, and before the application is running (page 10, parag.3-4). The Examiner disagrees, because based upon the understanding of the claim in light of the 35 USC 112 rejection, Shaw teaches the display of advertisements, using files containing the ads and instructions to display the them, while the application is offline or the application is run to access data from the server (col.4, lines 41-67, col.14, lines 1-67).

The newly submitted claims cannot be entered, because they require a new search and/or consideration to determine their patentability.

Regarding claim 48, the Applicants submit that no motivation to combine Shaw and Acres has been shown (page 11, parag.5-page 12, parag.1). The Examiner disagrees, because of all the reasons taught by Acres not excluding displaying ads while offline without having to constantly interact with a server (0016), thereby freeing up resources needed by the computer to dedicate elsewhere, such as the resource-intensive playing of a video game.
